

Tickenham Parish Council response to consultation on Creating Sustainable Buildings and Places Supplementary Planning Document (2015) Proposed update 2021

Creating Sustainable Buildings and Places Supplementary Planning Document (2015) Proposed update 2021

Please share your views with us on the Creating Sustainable Buildings and Places Supplementary Planning Document:

We are in agreement with the contents of the Supplementary Planning Document.

We would, however, make the comment that the document contains several undefined abbreviations, in the first 6 pages, some of which are written out in full in later text.

This is a technical document but if you are serious about consultation, please help out those who do not deal with these matters on a daily basis and provide appropriate definitions or, better, still please stop using abbreviations. They may save you a small amount of time but they require considerable research to make sense of the document (and sometimes the abbreviations cannot be found, eg: SAP – we do not think you are referring to the liquid that flows in trees).
